

MIXSYS MIXING SYSTEMS AND COMPONENTS FOR PLANTS

MIXSYS EXTRACTASHAFT – QUICK CLEAN SYSTEM

The **MIXSYS EXTRACTASHAFT MIXER** delivers well-balanced and uniform particle distribution of blending ingredients. This Enhanced Mixer Cleaning system is one of a kind industry first with the ultimate quick cleaning technology. The fully extended rotor shaft is an innovation solution that enables the operator to easily access any point inside the mixing chamber and obtain the complete cleaning of the mixing wall and rotor shaft.

Benefits and Technical Features:

Inspection Gate:

- Excellent Sealing
- Inspectional-hatch with gas- struts
- Total Safety
- Easy Inspections

Mixer with fully extractable rotor shaft:

- Rotor Shaft can be cleaned out of the mixing chamber
- Closing system with safety blocks

Compact Drive:

- Optimized performance
- Low maintenance
- Reduced encumbrance

Homogenizer complete with knives:

- Clamp fixing for fast assembly
- Compact and light weight for easy handling
- Suitable for food processes (with anti-settling solution)
